Outpatient Visit Summary

Example Community Medical Center • Encounter TEST-2048-2026-10-20

Patient: Alex Morgan (fictional) **Patient ID:** TEST-2048

Date of Birth: 1985-04-12 (fictional) **Document Date:** 2026-10-20

Facility: Example Community Medical Center (fictional)

Encounter Summary

Encounter type: Outpatient evaluation. Visit date: 2026-10-20. Chief concern: intermittent fatigue and increased thirst for approximately three weeks. Patient reports no chest pain, shortness of breath, fainting, or acute distress.

History and Findings

Fictional history: Patient reports a sedentary work routine and a family history of type 2 diabetes in one first-degree relative. No medication allergies are recorded in this sample. These details are invented for testing.

Vital signs: Blood pressure 128/82 mmHg; pulse 78 beats/min; temperature 36.8 °C; respiratory rate 16/min; oxygen saturation 98% on room air; BMI 27.4 kg/m².

Assessment

1. Fatigue — symptom documented; cause not established in this sample.

2. Increased thirst — symptom documented; correlate with laboratory findings and clinical assessment.

3. Elevated fasting glucose in accompanying fictional laboratory report.

Plan / Follow-up

The fictional clinician documented advice to arrange follow-up with a qualified healthcare professional for review of the laboratory results, lifestyle discussion, and further evaluation as clinically appropriate. No diagnosis or medication change is made in this test document.

Source note

This document is designed to test retrieval of encounter date, symptoms, vital signs, assessment items, and follow-up wording. It intentionally avoids asserting a definitive diagnosis.

Notice: This document contains entirely fictional data created for software testing and RAG evaluation. It is not medical advice and must not be used for diagnosis or treatment.
