Laboratory Report

Example Diagnostics Laboratory • Specimen TEST-LAB-7781

Patient: Alex Morgan (fictional) **Patient ID:** TEST-2048

Date of Birth: 1985-04-12 (fictional) **Document Date:** 2026-10-20

Facility: Example Community Medical Center (fictional)

Laboratory Results

Specimen: Fasting blood sample (fictional). Collection date: 2026-10-20. Report date: 2026-10-20. Values below are synthetic examples.

Test	Result	Reference range (example)	Flag
Fasting plasma glucose	126 mg/dL	70–99 mg/dL	High
HbA1c	6.4 %	4.0–5.6 %	High
Total cholesterol	192 mg/dL	<200 mg/dL	Within example range
LDL cholesterol	118 mg/dL	<100 mg/dL (optimal example)	Above optimal
HDL cholesterol	46 mg/dL	≥40 mg/dL	Within example range
Triglycerides	142 mg/dL	<150 mg/dL	Within example range
Creatinine	0.9 mg/dL	0.6–1.3 mg/dL	Within example range

Interpretation note

The synthetic fasting plasma glucose value is 126 mg/dL and HbA1c is 6.4%. This report does not establish a diagnosis. In real clinical care, laboratory results require interpretation by a qualified clinician in context and may require confirmation.

Question-answering test facts

- Fasting plasma glucose: 126 mg/dL
- HbA1c: 6.4 %
- Specimen collection date: 2026-10-20
- Creatinine: 0.9 mg/dL
- LDL cholesterol: 118 mg/dL
